

Digital Maker Space / Computer Workstations

Digital maker spaces are places where teams come together using open online project platforms to collaborate on solutions in entrepreneurship, conservation, technology, and more. Settings like the digital maker space accommodate this type of collaborative work allowing teams to converge together but also providing the space and room to focus on individual pieces of the solution. Amobi can be used to create multiple settings such as a pinwheel formation making collaboration effortless. The height adjustability built into every Amobi desk also provides ease of access and inclusivity for users with varying abilities.

- Amobi Desk
- Amobi Team
- Bixby Lite Work
- West Elm Work Nimbus
- 3F Hanging Panels
