

Evidence-based Virtual Library & Research Services for Hospitals, Corporations, & Educational Institutions

HPC's Enterprise Librarian

is an innovative library management service that combines on-demand research support from a dedicated, masters-trained HPC librarian, oversight of library subscription resources, and a virtual library portal experience for academic institutions.

[Check out our video to learn more!](#)

We match an institution's higher education goals and evidence-based practice standards with the right mix of **evidence-based resources**, while at the same time providing recommendations to remain cost-conscious. HPC can be hired to simply provide a little extra help virtually during busy times, assist researchers with literature searches as a part of grants and other R&D projects, working alongside your existing librarian team that manages the physical library space; or, if you don't have a librarian team currently, **HPC can be hired to do it all.**

24/7 Library and Research Services

- Article request
- Evidence-based research
- Literature searches
- Oversee subscriptions
- Build/maintain library web portal
- Annual budget oversight
