We are so confident in our product and service that we fully warrant the ring to be free from defects in workmanship and/or material for the lifetime of the ring.

A RING PROGRAM OF YOUR CHOOSING

Herff Jones will work with you to design and build a custom ring style or collection that is unique to your school. Our talented designers have worked with many of the top ring programs in the country to create distinguishable class rings like none other. From shanks and bands that specifically honor your school's traditions to encrusting your school's mark on the stone—we can create the rings, and ring program, that honors your school and brand.

Single-Concept Ring Program

With a single-concept ring program, your school works with our designers to create a single ring that is offered to your student body. The idea behind a single-concept program is that all the students from your university are united by the fact that each and every graduate always gets the same ring. With a single concept ring program, the school can customize the ring by choosing the band style, stone color and whether or not the stone is encrusted with a mascot logo or school emblem.

Official Licensed Ring Program

With an Official Licensed Ring Program, you are able to design a ring that is completely custom, top to bottom. The ring can include special university traditions or aspects of the campus, along with a custom band, stone color and more. In addition to the special class ring students would also have the option of designing their own ring from our traditional ring offerings.

Traditional Ring Program

With a traditional ring program, the students are the ones who get to make their ring look like what they want it to. From a predetermined set of ring styles they can choose stone color, stone cuts, different metal options as well as engravings. If you wish we can also work with you to allow them to include the official school logo, emblems or mascot.
