

## Klein Tools: Trusted by Professionals for 166 Years

Klein Tools was founded in 1857 by industrious German immigrant Mathias Klein who began his business by repairing a lineman's broken side-cutting pliers by forging and finishing a new half and riveting it to the old half. It wasn't long before that satisfied customer returned to have the other side replaced. Soon thereafter, word spread of this exceptional pair of pliers. Klein has been making high quality hand tools ever since.

The first tool that Klein ever manufactured, and our largest category, is pliers. Built to exceptional quality standards, they simply feel right, work right and are just one example of the Klein tools trade professionals rely on every day. Made using our proprietary blend of USA steel, every step in the production process is done right here in America.

Today, as an industry leader, Klein Tools manufactures over 4,000 different products annually across numerous product categories including drivers, meters and personal protective equipment.

## Lowe's Will Carry the Newest Klein Product Introductions

With our focus on innovation, Klein Tools is constantly releasing new tools to meet the ever changing needs of trade professionals. You can count on Lowe's to carry the newest products as well as the largest retail selection of Klein products anywhere in the USA.

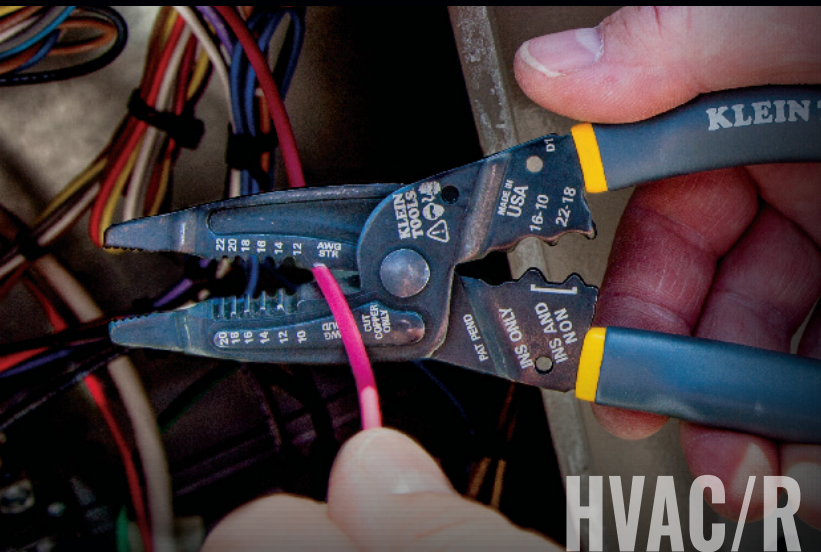

## Tools For All the Trades

While Klein Tools is famous for our industry-leading pliers and drivers, we're more than just electrical hand tools. We manufacture a wide array of products to serve the needs of trade professionals in the Construction, HVAC/R, and Plumbing industries.
