

CSU

Yokogawa Spinning Disk
Field Scanning Confocal Systems

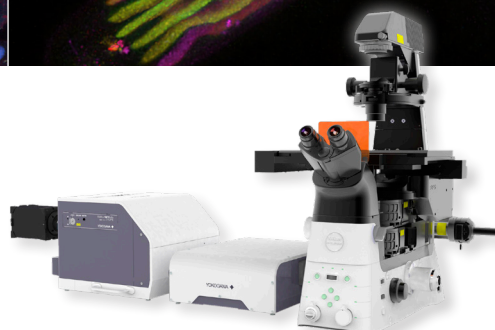

Enhance Your Research with CSU Spinning Disk Confocal Systems from Yokogawa and Nikon

The CSU series of field scanning confocal spinning disk systems from Yokogawa, integrated with Nikon's microscope platform and optics, allow users flexible and powerful systems for a wide range of imaging applications. These innovative field scanning systems achieve fast, high-resolution imaging with low light dosage, making them ideal for live cell or organism applications.

CSU-W1

Ultra-wide Field of View

CSU-W1 SoRa

Confocal and super-resolution
in a single system

CSU-X1

Faster, brighter and more
versatile confocal imaging
