## Harnessing the Power of CDW Talent Orchestration

Through CDW Staff Augmentation Services, your organization can increase agility and respond to rapidly changing business needs. We enhance engineering teams' bandwidths without the commitment of hiring an employee. Hiring dedicated CDW resources offers your organization:

- Access to critical technology expertise and skills
- Flexibility and the ability to quickly respond to a dynamic environment
- Cost savings through minimizing payroll on project-based technology initiatives
- Time savings through CDWs technical vetting process

## Squad Engineering

Execute on your critical projects with a full time or ad-hoc approach  
Difficult to resource technology professionals  
Shorten project lifecycle  
**Broad Technical Base:** SAP, Salesforce, Service Now, Cloud, Software, Digital, Data, many others

## Supplier Management

**Technical Services Supplier Management**  
Our network of boutique firm suppliers allows us to tap into a wider pool of technologists with direct-sourcing. We deliver candidate resumes within 48 hours of vetting an engagement with SLAs driving engagement with our partners

## Customer Success Story

An extensive research University planned a data governance and warehousing project and sought CDW - Education staffing support to fill four roles to initiate the project. The CDW - Education Talent Orchestration team scoped the roles and recruited interviewees. The customer selected four candidates to join their team on a contract basis. The four Staff Augmentation Contractors started working for the customer almost immediately. The customer is excited about their added agility and ability to complete the Data Governance and Data Warehousing Project in a timelier manner.
