From Discovery to Final Solution

Our seasoned market experts understand the pain points of your industry. They'll come walk your facility to learn more about your struggles, goals, and specific requirements. In conjunction with our team of in-house engineers and designers, they'll help to build a bin that will incorporate both your functional needs and design.

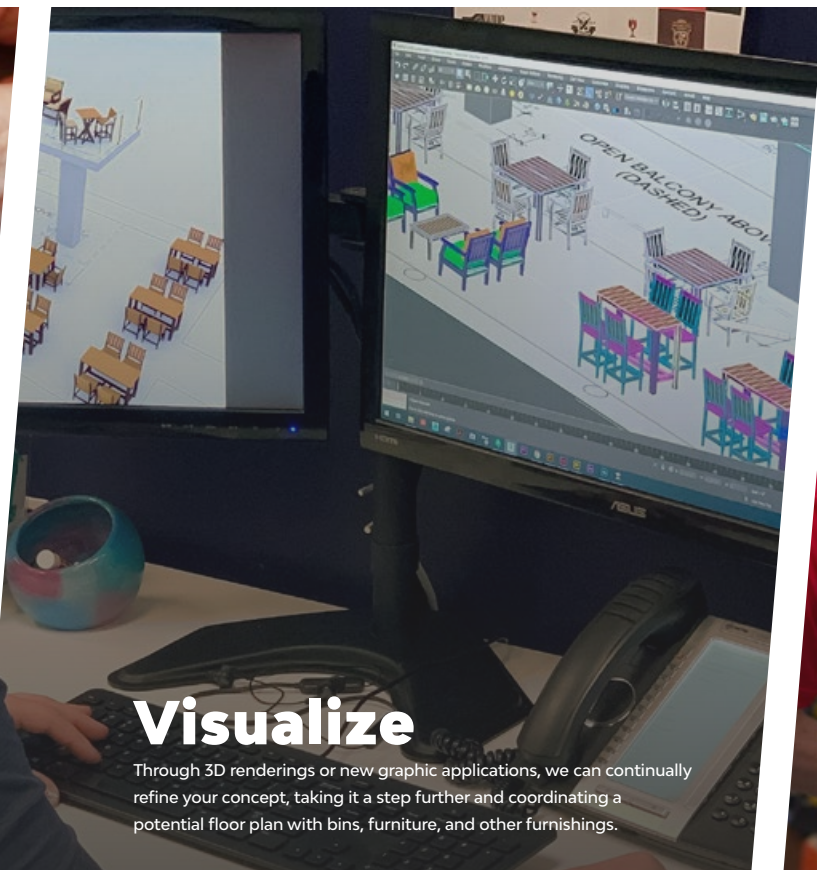

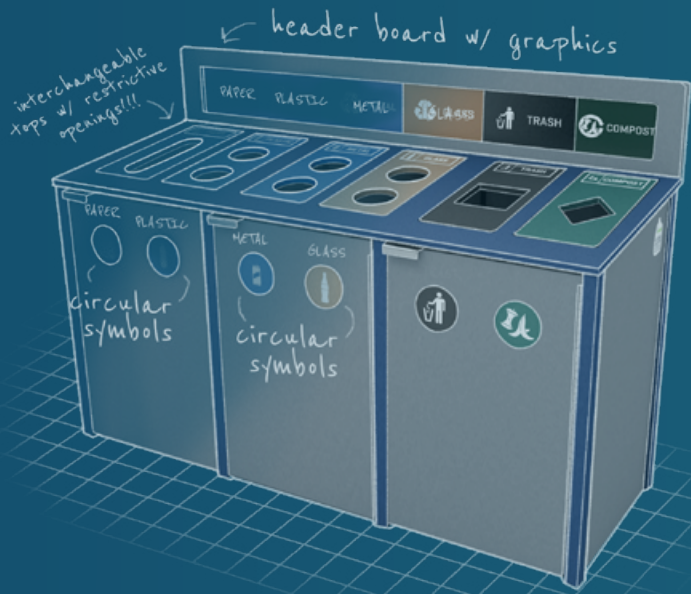

Discover

As the experts in the industry, our sales staff will work with you to talk through your sustainability pain points and customize a bin to your facility's exact needs.

Concept

The genesis of bringing customer concepts to life. Utilizing your unique goals discussed in the discovery phase, we sketch out the initial rough idea, to start the process of pre-visualizing your products.

Visualize

Through 3D renderings or new graphic applications, we can continually refine your concept, taking it a step further and coordinating a potential floor plan with bins, furniture, and other furnishings.

Build

Our in-house engineering department works diligently to continuously test, improve, and create new, innovative solutions, which is then hand-built by our manufacturing team.

Customer Innovations

WE WANT TO HEAR YOUR IDEAS

Large or small, we have the ability to tailor your bins and furnishings from concept to the final product, giving you the freedom to design to your sustainability goals or branding needs while creating an inviting experience across your entire facility.

KRISPY KREME

Custom Terra Single Bin

- Decorative accent piece to match the receptacle shape with the Krispy Kreme logo
- Clean panel design with subtle branding was used on the bottom corner of the front door for a more contemporary aesthetic

UNIVERSITY OF CALIFORNIA—BERKELEY

Custom Large Capacity E-cycler

- Standard vertical e-cycler on left with a wider top load stream for large, higher value electronics
- Custom header board graphic properly explains what should be captured for these unique streams

AMERICAN FAMILY INSURANCE

Custom Terra Triple Bin

- Branded header board design unique to all American Family facilities
- Customer-provided graphics for consistent sustainability messaging

JOLIET JUNIOR COLLEGE

Custom Presentation Podium

- Shelved unit with specialized compartments and slots for cords
- Hinged top with clear window for monitor and keyboard display

MICROSOFT

Custom E-cycler

- Custom-built compartment with clear window to encourage safe disposal of used batteries
- Orange top with specified openings and labels for unique eye-catching bin
- Full panel graphics tailor made for facilities across state and national borders

COLORADO COLLEGE

Custom Oxford Quad Receptacle

- Liquid Capture compartment on far left for zero waste initiatives across campus
- Header board with proprietary graphics for consistent sustainability messaging

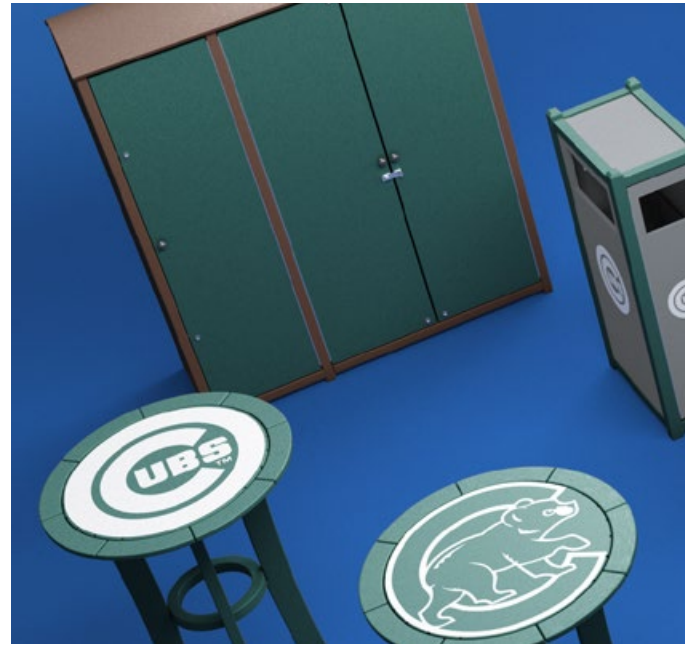

1 Site Planning

The initial phase where bins, furnishings, and furniture were placed for optimal footprint within the allotted space.

WRIGLEY FIELD

In 2019, Max-R first collaborated with Wrigley Field to furnish some new renovations to their Left Field Porch. As part of their 1060 Project, the organization intends to invest in Wrigley Field and the surrounding neighborhood in order to "improve the guest experience and keep millions of Cubs fans returning to Wrigley Field every year."

2 Visualization
 After approval, 3D artists helped to visualize the lineup of products with their respective graphics, colors, and features.

3 Installation
 The durable bins and furniture were placed in accordance with the approved plans, taking the guesswork out of the equation.

5 Final Results
 The ultimate fan experience is achieved, the facilities crew simply did not need to constantly maintain the furniture.

4 Coordination
 Outdoor furnishings made from Max-R Lumber™ can withstand the high traffic from fans and Chicago weather.

CLIMATE PLEDGE ARENA

The World's Most Ambitious Arena To Tackle Zero Waste

CLIMATE PLEDGE ARENA

With its 2024 zero waste goal (97% diversion rate in the industry), Climate Pledge Arena partnered with Max-R due to past success with similar venues. The Terra and newly-named Champion Collections were strategically utilized to provide proper guest engagement and reduce stream contamination.

2024 GOALS

Waste Diversion Rate
97%+

Carbon Zero
100%

Zero Single-Use Plastic
100%

Convert to Zero Waste without Sacrificing Footprint

Former landfill stream converts to Compost, while the Recycle stream is split with Landfill.

- As of September 2020, any California business that generates over two cubic yards of organic waste must set up clearly-labeled organic waste collection
- Ensure compliance with proper color-coded streams and to prevent costly cross-contamination
- Easily apply graphics from CalRecycle or other ordinances

FUTURE PROOFING YOUR NEEDS

Move to Zero Waste

Utilizing interchangeable tops and graphics, you can demonstrate an intent to properly capture organic waste when the time comes by law or as your values move towards a zero waste facility.

Before
Temporary center stream

After
Smaller Landfill stream, former spot used for Compost

Recycled Plastic Makes Perfect Sense

MAX-R LUMBER™

Max-R Lumber™ is made from 95% pure post consumer HDPE – milk jugs – and is designed for maximum strength and resiliency. It is the purest grade of recycled plastic available in the industry today. Premium grade resins and UV inhibitors are added to the lumber to prevent fading from sun exposure and to ensure our product’s aesthetics and integrity throughout years of use. Since Max-R Lumber™ doesn’t absorb moisture, it is resistant to mold, rotting, and won’t harbor insects. The result is industry leading, long-lasting, sustainable site furnishings.

PUT TO THE TEST

How Does Max-R Lumber™ Stack Up?

Resistant To Mold And Mildew	✓	✗	✓	✓	✗	✓	✗
Will Not Harbor Bacteria	✓	✗	✓	✗	✗	✓	✗
Low-Maintenance	✓	✗	✓	✗	✗	✓	✓
Doesn't Require Painting/Sealing/Staining	✓	✗	✗	✗	✗	✗	✗
Can Withstand Outdoors All Year	✓	✗	✗	✗	✗	✗	✓
Variety Of Profiles, Colors, Finishes	✓	✗	✗	✗	✗	✗	✗
Made From Recycled Material	✓	✗	✓	✗	✗	✗	✗
Easily Cleaned, Sanitized with Soap & Water	✓	✗	✓	✗	✗	✓	✗

LEED® v4 Credits

The LEED® green building certification program is the nationally accepted benchmark for the design, construction and operation of green buildings. Max-R Lumber™ products are made of 95% pure post-consumer HDPE and may contribute to your LEED® v4 credits under MR 4.1 and MR 4.2.

- **Building Life-Cycle Impact Reduction (2-4 Credits)**
Max-R Lumber is long lasting and can be accepted back when it reaches the end of its lifespan to reuse once again.
- **Building Product Disclosure and Optimization: Sourcing of Raw Materials (1 credit)**
Because Max-R Lumber is made from 95% pure recycled content, you can earn a credit for using the material on your projects.
- **Building Product Disclosure and Optimization: Material Ingredients (up to 2 credits)**
Max-R Lumber does not contain any chemicals or other compounds that are damaging to the environment.

All Season

Suitable for all climates; stands up to rain, snow, wind, salt spray, and sunlight—leave outdoors all-year.

Durable

Won't rot, split, or delaminate. Solid color throughout ensures a "like new" look for years to come.

Regional Footprint

The majority of our raw materials are sourced from within a 150-mile radius of our facility in Sussex, Wisconsin.

Pure Recycled Material

Made of 95% pure post-consumer HDPE and may contribute to LEED® goals under MR 4.1 & MR 4.2.

LEED v4 Credits

Fulfills credits in the Building Design and Construction category of LEED v4 rating system, potentially earning up to 9 credits.

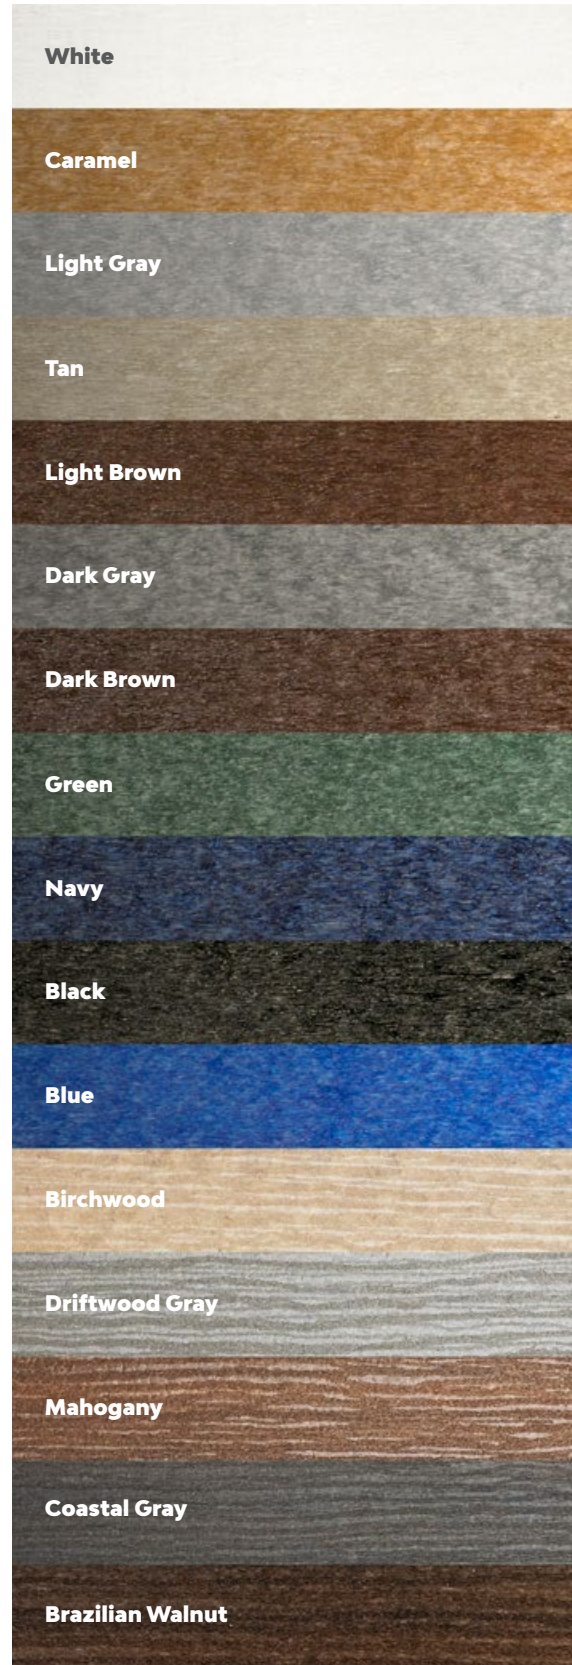

Closed Loop

95% purity allows material to be recycled multiple times, all scrap is collected for future products.

Swire Coca-Cola

Overview

SUSTAINABLE VALUES WITH PURPOSE

Swire Coca-Cola is an advocate for sustainability, believing that their business has the responsibility to make the right choices to help the environment and inspire others to do the same. They partnered with Max-R to manufacture their waste and recycling receptacles to help meet their zero waste goals because they knew we were kindred spirits in leaving the world better than we found it.

Concept & Visualization

In order to help with Swire's unique goals, Max-R's design and engineering teams went to work to create a bin that was both adaptable for future goals and visually-stunning.

PROJECT SCOPE

Deliverable

106 Bins

Milk Jugs Saved

164,300+

Results

With its unique overlay graphics and interchangeable elements, the quad stream bin was perfectly-poised to help Swire with its sustainable development strategy set to go in effect in 2030.

- Future-Proofed Streams with Interchangeable Tops & Graphics
- Unique Site-Wide Branding with Eye-Catching Full Panel Graphics
- Eye-Level Messaging provided by Header Board

ALBANY Summary

The Albany Collection utilizes a slow-stay hinged top, post and panel construction, and contoured design to add a modern element to your waste & recycling efforts.

Double Top Load

Header Board with Interchangeable Graphics, Color Coded Tops with Overlay IDs, Restrictive Openings, Engraved Logo

ALBANY Features

Large, Clean Front Panel Design

Smooth front panels allow space for branding and unique graphic solutions.

Flush Posts with Panels

The unique presence of the Albany's front panel is flush with its posts, giving it a truly modern design.

- Levelers, rigid liners, 316 marine-grade stainless steel hardware included on all Innovat-R® receptacles

Distinctive Swoosh Tops

Slow stay tops with unique curved design is a new age aesthetic to give end users something to marvel at.

Hinged Side Doors

Efficiency and serviceability at each bin keeps your costs down and minimizes safety hazards.

Vail Color Coded Tops, Restrictive Openings, Overlay Logo & Symbols

OXFORD Summary

The Oxford Collection features smooth panels and clean lines that give it an effortless, modern look akin to cabinetry that blends in where ever it is stationed.

Triple Top Load

Vail Top, Color Coded Opening Labels, Overlay Graphics, Engraved Logo

OXFORD Features

Hinged Top-to-Bottom Doors

Whether front or side load, hinged doors extend from bottom of the beveled top to safely above the ground or floor.

Beveled Top Edges

A decorative feature that further aligns its core design with cabinetry.

Smooth Panel Designs

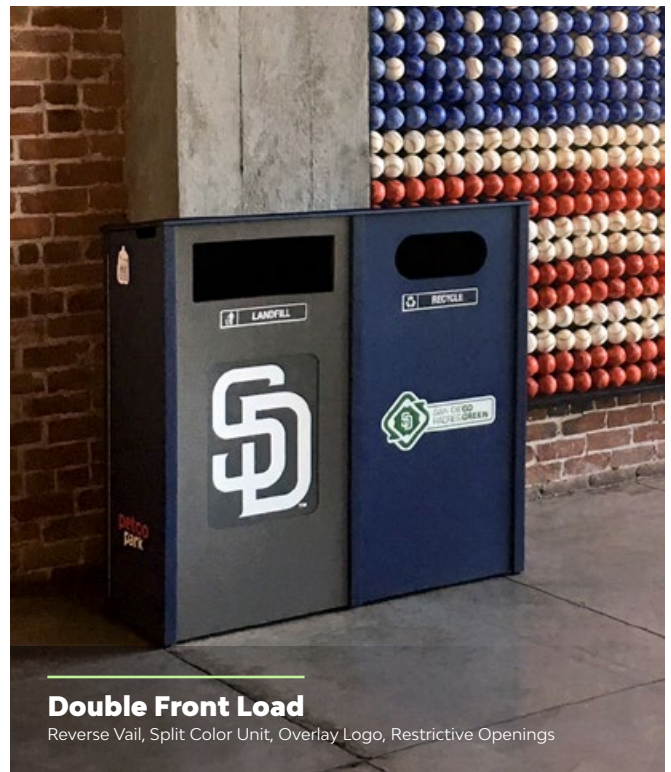

Hidden horizontal side rails help make Oxford look and feel smoother with fewer seams.

- Levelers, rigid liners, 316 marine-grade stainless steel hardware included on all Innovat-R® receptacles

Triple Top Load

Split Color Tops with Split Configuration, Full Door Graphics

TERRA Summary

The Terra Collection is known for its versatility in design. With post and panel as a constant, add or remove the engraved panel design and contrasting colors depending on your recycling program needs and design aesthetics.

Triple Top Load

Vail Top with Hinged Door, Overlay Opening Labels, Door Graphics

TERRA Features

Hinged Door

Efficiency and serviceability at each bin keeps your costs down and minimizes safety hazards.

Smooth Radius Tops

When a flat, vail, or curved top is applied, the Terra employs a utilitarian design to fit in better in an all-weather application.

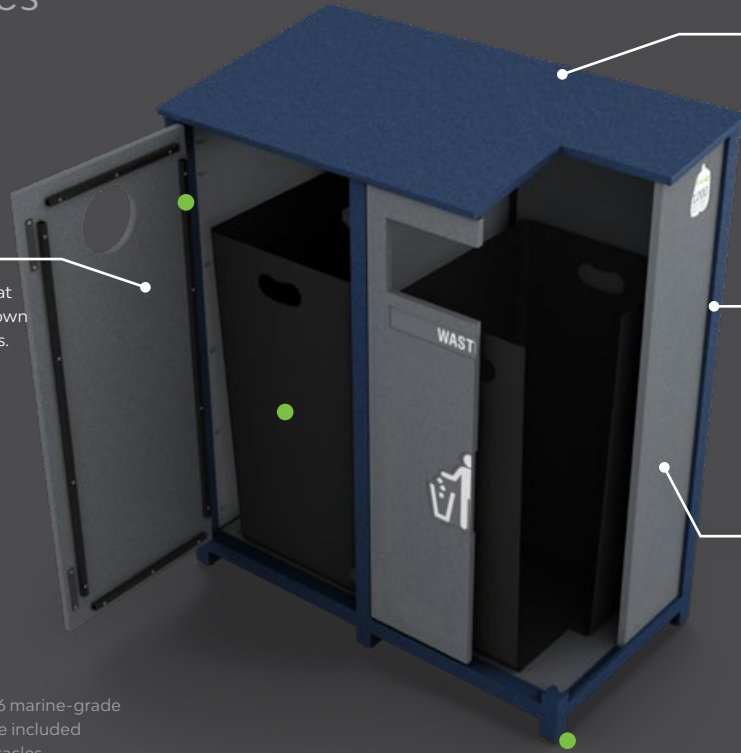

Post & Panel

Framed using dado-slot and pocket-screw construction for strength and high performance.

Versatile Panels

For a more contemporary aesthetic, the panel designs on a Terra can be left smooth or a variety of patterns can be applied.

- Levelers, rigid liners, 316 marine-grade stainless steel hardware included on all Innovat-R® receptacles

Double Front Load

TUSCANY Summary

Ideal for indoor use, the Tuscany Collection is distinctly known for its use of our Max-R Lumber™ coupled with an Ipe Hardwood trim. With the new inclusion of wood grain recycled plastic trim, the Tuscany can still provide a refined aesthetic without deforestation.

Double Front Load

Vail Top, Overlay Symbols

TUSCANY Features

Versatile Trim

Utilize Max-R Lumber (smooth or wood grain texture) or Ipe hardwood.

Hinged Door

Efficiency and serviceability at each bin keeps your costs down and minimizes safety hazards.

Beveled Top Edges

A decorative feature that further aligns its core design with indoor cabinetry.

Smooth Panels

Clean design keeps the focus on the character of the trim.

Fully Framed Openings

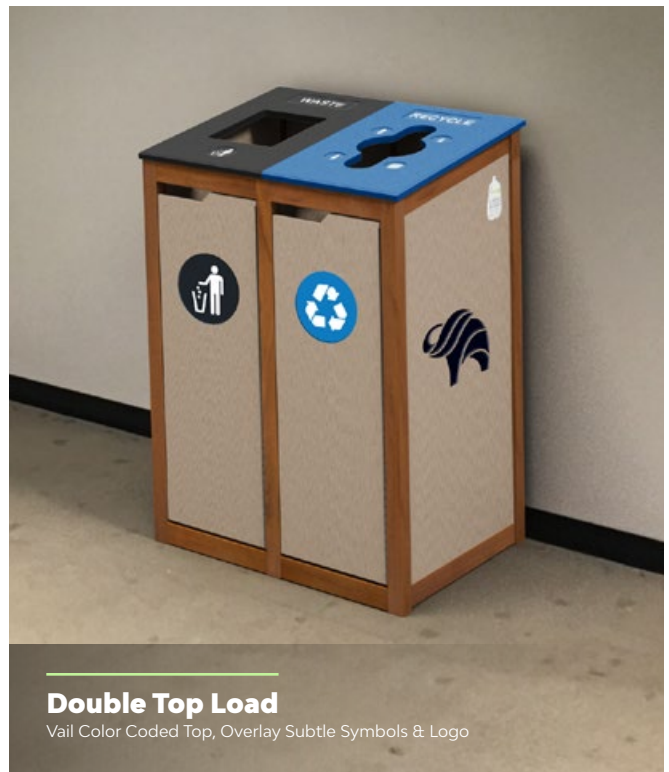

Front load doors with a full opening are framed out with trim pieces for visual balance.

- Levelers, rigid liners, 316 marine-grade stainless steel hardware included on all Innovat-R® receptacles

Double Top Load

VERDE Summary

The Verde Collection features stylized arches, and contrasting colors. A cousin of the Halston Collection (now part of Verde's lineup), the Verde's signature feature is its arched panel design.

Triple Top Load

Flat Header Board with Full Graphic, Vail Top with Interchangeable Restrictive Openings, Engraved Symbols

VERDE Features

Arched Design Elements

A distinctive feature of the Verde lies in its remarkable arched design.

Hinged Door

Efficiency and serviceability at each bin keeps your costs down and minimizes safety hazards.

Hearty Profile

Built for indoors or outdoors with as an all-weather solution.

Inset Border

An inner border on all panels to create the illusion of a wider presence to the bin.

- Levelers, rigid liners, 316 marine-grade stainless steel hardware included on all Innovat-R® receptacles
